### BUCKET CAPACITY

max. 6,91 m<sup>3</sup>

# Walk-Around

The Komatsu Dash 8 crawler excavators set new worldwide standards for quarry & mining equipment. Operator safety and comfort is a focal point in their design, and their outstanding performance and specifications will contribute directly to the success of your business. These powerful and robust machines are designed to stand up to the hardest working conditions while still maintaining maximum productivity. Safely rely on Komatsu's 80 years of experience and commitment to quality and durability: your Dash 8 crawler excavator will quickly become your number one business partner.

## Powerful and environmentally friendly

- Low consumption ecot3 engine
- Hydraulic drive radiator cooling fan
- Less ambient noise
- Eco-gauge and idle caution
- Selectable working modes

## Maximum productivity

- Powerful digging force
- PowerMax
- Heavy lift mode
- Shockless boom control
- Swing priority mode
- Additional hydraulic functions

# PC800-8

## ENGINE POWER

370 kW / 496 HP @ 1.800 rpm

Komatsu wireless  
monitoring system

## Quality you can rely on

- Reliable and efficient
- High strength booms and arms
- High pressure in-line filtration
- Komatsu-quality components
- Rugged design

# Maximum Productivity

## Powerful digging force

Thanks to the high engine output and an optimised hydraulic system, the PC800-8 delivers a powerful bucket digging force of up to 471 kN (48 tonnes) at PowerMax and an arm crowd force of up to 374 kN (38,1 tonnes) at PowerMax.

## PowerMax

The PC800-8 is now equipped with the one-touch PowerMax function that gives you maximum digging force when you need it most. It increases standard digging force by almost 10% and automatically switches off after 8 seconds to conserve fuel.

## Heavy lift mode

When handling rock or for heavy lifting applications, the operator can select the “heavy lift” mode to gain 10% more lifting force on the boom.

## Two-mode boom control

*Smooth mode*  
Boom floats upward, reducing lifting of machine front. This facilitates gathering blasted rock and scraping down operations.

## Shockless boom control

The PC800-8 features a shockless valve (double-check slow return valve) that automatically reduces the vibration level when operating the boom. Operator fatigue is reduced - which can improve safety and productivity- and spillage caused by vibrations is minimised.

## Swing priority mode

A twin swing motor system provides excellent swing performance, with high speed and strong braking power. The swing priority setting allows using the same smooth motion for either 180° or 90° loading operations. By altering the oil flow, the operator selects either boom or swing as the priority for increased production.

## Additional hydraulic functions

The PC800-8 can be equipped with additional hydraulic functions, suitable for operating hydraulic breakers up to 450 l/min or hydraulic crushers up to 900 l/min. Two additional hydraulic function options are available, allowing you to match the demands of your work.

*Power mode*  
Boom pushing force is increased, ditch digging and box digging operation on hard ground are improved.

# Powerful and Environmentally Friendly

## Low consumption ecot3 engine

Designed and manufactured by Komatsu, the SAA6D140E-5 engine provides high torque, a better performance at low speed, and low fuel consumption. With direct fuel injection, turbocharger, common rail air-to-air aftercooler and cooled EGR system, productivity and fuel efficiency are maximized. The Komatsu SAA6D140E-5 engine is certified for EU Stage IIIA emission regulations.

## Hydraulic drive radiator cooling fan

The engine cooling fan rotation speed is electronically controlled and depends on the engine coolant and the hydraulic oil temperatures: the higher the temperature, the faster the fan will turn. This system increases fuel efficiency, reduces the operating noise levels and requires less horsepower than belt driven fans.

## Less ambient noise

The PC800-8 is an exceptionally powerful machine that maintains low operating noise levels. In addition to the electronically-controlled variable-speed fan drive, external noise levels are further reduced to meet EU Stage 2 noise regulations by a low-noise glass wool furnished muffler with cover, a hybrid fan, and low-noise components.

## Exceptional drawbar pull and steering force

Regardless of the selected travel speed, the final drives automatically compensate for the load and give maximum driving force whenever needed. As a result, the PC800-8 generates exceptional drawbar pull and steering force, giving smooth, confident and safe machine movement.

Komatsu SAA6D140E-5

Variable speed fan

## Eco-gauge and idle caution

The unique ECO-gauge helps the operator reduce emissions and fuel consumption for environmentally friendly and energy saving operations. And to further avoid wasting fuel when the machine is not actually working, a standard-fit idle caution is displayed if the engine idles for 5 minutes or more.

Eco-gauge

## Selectable working modes

The selectable “Power” or “Economy” modes are designed to match the engine speed, pump speed and system pressure to the current application. They give the operator the flexibility to match the equipment performance to the job at hand. The Economy mode has 4 stages, for an optimum combination of economy and production, while Power Modes can be switched to reduce fuel consumption where maximum breakout force is not needed.

# First-Class Operator Comfort

## Wide spacious cab

The wide and spacious cab includes a newly designed heated air suspension seat with a high backrest. The seat height and longitudinal inclination are easily adjusted with a pull-up lever. You can also set the operational posture of the armrest and the position of the console or recline the seat all the way and place it into a fully flat state with the headrest attached.

## Pressurised cab

An automatic air conditioner, an air filter and a positive internal air pressure (60 Pa) combine to prevent external dust from entering the cab.

## Low noise design

Komatsu Dash 8 crawler excavators feature the lowest in-class external noise levels and are especially well-suited for work in confined spaces or urban areas. Reduced fan speed, a large capacity radiator, and the optimal usage of sound insulation and of sound absorbing materials help to make noise levels inside Dash 8 excavators comparable to those inside an executive car.

## Cab damper mounting

The built-in stability of the Komatsu PC800-8, combined with a highly rigid deck and a sprung multi-layer viscous mount system, drastically reduces vibration levels for the operator.

Automatic air conditioner

Storage compartment

3 button lever

## Large, widescreen TFT monitor

To enable safe, accurate and smooth work, the user friendly monitor is the highly intuitive user interface for the machine's Equipment Management and Monitoring System (EMMS). Multilingual and with all essential information available at a glance, it features simple and easy to operate switches and multifunction keys that provide the operator with fingertip access to a wide range of functions and operating information.

# Highest Safety Standards

## Safe SpaceCab™

Specifically designed for Komatsu excavators, the Dash 8 cab has a tubular steel frame. It provides very high shock absorbency, impact resistance and durability. The seat belt is designed to keep the operator in the safety zone of the cab in the event of a roll-over. At your request, the Komatsu PC800-8 can also be fitted with an ISO 10262 Level 2 Falling Object Protective System (FOPS).

## Safe and easy maintenance

Thermal guards are placed around high temperature parts of the engine. The fan belt and pulleys are well protected and in case of damage, fire risk is reduced by a pump/engine partition that prevents hydraulic oil from spraying onto the engine.

## Safe access

A wide catwalk and large handrails give safe and easy access to the cab and to maintenance check points. Very durable anti-slip plates – with additional high friction covering – maintain long term traction performance.

Safe SpaceCab™

## Excellent visibility

The PC800-8's large capacity cab and increased glass area provide superb front visibility. Large mirrors on both sides ensure that machine visibility meets the latest ISO standards. Additional work lamps and a rotating beacon are fitted as standard, further enhancing safety.

## Laminated front screen

The front screen of the PC800-8 is made of laminated glass, for enhanced protection against chips produced by rock breaking work. The single-piece design offers an uninterrupted view of the working area.

Step light with timer

Standard rear view camera

# Quality You Can Rely On

## Reliable and efficient

Productivity is the key to success – all major components of the PC800-8 are designed and manufactured by Komatsu. All essential functions are perfectly matched for a highly reliable and productive machine.

## High strength boom and arm

Thanks to the large cross-sectional structure made with high tensile strength steel and a thick plate and partition wall, the boom and arm provide excellent durability and are highly resistant to bending and twisting. Highly durable rubbing strips on the underside of the arm protect the structure from any material that might fall from the bucket.

## High pressure in-line filtration

The PC800-8 has the most extensive filtration system available, providing in-line filters as standard equipment. An in-line filter in the outlet port of each main hydraulic pump reduces failure caused by contamination.

## Komatsu-quality components

With the latest computer design techniques and a thorough test programme, Komatsu's global know-how produces machines that are designed, manufactured and tested to meet your highest standards.

## Rugged design

Komatsu strives to minimise the welding areas on every machine - particularly in highly loaded areas. The swing circle mounting on the upper structure of the machine and the undercarriage tower to which the swing circle is attached are made from one piece of solid steel, with no welding. The undercarriage is strengthened to provide excellent reliability and durability when working on rocky ground or blasted rock. Sturdy guards shield the travel motors and piping against damage from rocks.

*Komatsu bucket with Kmax teeth*

*Sturdy travel motor guards*

*Full length track roller guards (optional)*

# Komatsu Wireless Monitoring System

## The easy way to higher productivity

KOMTRAX™ is the latest in wireless monitoring technology. It delivers insightful and cost saving information about your fleet and equipment and offers you a wealth of information to facilitate peak machine performance. By creating a tightly integrated web of support it allows pro active and preventive maintenance and helps you to efficiently run a business.

## Knowledge

You get quick answers to basic and critical questions about your machines - what they're doing, when they did it, where they're located, how they can be used more efficiently, and when they need to be serviced. Performance data is relayed by satellite from your machine to your computer and to your local Komatsu distributor - who's readily available for expert analysis and feedback.

## Convenience

KOMTRAX™ helps to conveniently manage your fleet on the web, wherever you are. Data is analysed and packaged specifically for easy and intuitive viewing in maps, lists, graphs and charts. You can anticipate the type of service and parts your machines could require, or troubleshoot problems before Komatsu technicians arrive on site.

## Power

The detailed information that KOMTRAX™ puts at your fingertips 24 hours a day, 7 days a week gives you the power to make better daily and long-term strategic decisions. You can anticipate problems, customize maintenance schedules, minimize downtime and keep your machines where they belong – working on the job site.

Through the web application, a variety of search parameters are available to quickly find information about specific machines based on key factors such as utilization rates, age, various notification messages, and more.

A simple chart shows the machine's fuel consumption and helps you to calculate total costs for a job site and conveniently schedule fuel deliveries.

# Easy Maintenance

## Steps connected to the machine cab

For easy engine and maintenance, steps allow access from the left hand catwalk to the top of the machine.

## Centralized service

Check points are concentrated on one side of the engine to facilitate daily servicing.

## Motorised grease gun equipped with hose reel

Greasing is made easy with the electric motorised grease gun and indicator.

## Easier radiator cleaning

Reverse rotation function of fan allows easier cleaning of the radiator.

## 5-step dust indicator

Informs of air cleaner clogging in 5 steps to warn of filter condition.

## Long-life oil filters

The hydraulic oil filter uses high performance filtering material for long element replacement intervals, which significantly reduces maintenance costs.

## Flexible warranty

When you purchase Komatsu equipment, you gain access to a broad range of programmes and services that have been designed to help you get the most from your investment. For example, Komatsu's Flexible Warranty Programme provides a range of extended warranty options on the machine and its components. These can be chosen to meet your individual needs and activities. This programme is designed to help reduce total operating costs.

## ENGINE

Model ..... Komatsu SAA6D140E-5  
 Type ..... Common rail direct injection, water-cooled,  
 cooled EGR, turbocharged, after-cooled diesel  
 Engine power  
 at rated engine speed ..... 1.800 rpm  
 ISO 14396 ..... 370 kW / 496 HP  
 ISO 9249 (net engine power) ..... 363 kW / 487 HP  
 No. of cylinders ..... 6  
 Bore × stroke ..... 140 × 165 mm  
 Displacement ..... 15,24 ltr  
 Fan drive type ..... Hydraulic, reversible

## HYDRAULIC SYSTEM

Type ..... Open-center load-sensing system  
 Additional circuits ..... Up to 2 additional circuits can be installed  
 Number of selectable working modes ..... 2  
 Main pump ..... Variable capacity piston pump  
 Pumps for ..... Boom, arm, bucket, swing, and travel circuits  
 Maximum pump flow ..... 2 × 494 ltr/min  
 Fan drive pump ..... Variable capacity piston pump  
 Hydraulic motors:  
 Travel ..... 2 × axial piston motor with parking brake  
 Swing ..... 2 × axial piston motor with swing holding brake  
 Relief valve settings  
 Implement circuits ..... 320 bar  
 Travel circuit ..... 350 bar  
 Swing circuit ..... 290 bar  
 Heavy lift circuit ..... 350 bar  
 Pilot circuit ..... 30 bar

## UNDERCARRIAGE

Construction ..... H-leg frame with box section track-frames  
 Track assembly  
 Type ..... Fully sealed  
 Shoes (each side) ..... 47 (PC800LC-8: 51)  
 Tension ..... Hydraulic  
 Rollers  
 Track rollers (each side) ..... 8 (PC800LC-8: 9)  
 Carrier rollers (each side) ..... 3

\* Load is limited by hydraulic capacity rather than tipping.  
 Ratings are based on SAE Standard No. J1097.  
 Rated loads do not exceed 87% of hydraulic lift capacity or 75% of tipping load.

# Lifting Capacity

## PC800LC-8

A – Reach from swing centre

B – Bucket hook height

C – Lifting capacities

– Rating over front

– Rating over side

– Rating at maximum reach

With 810 mm shoes

\* Load is limited by hydraulic capacity rather than tipping.  
 Ratings are based on SAE Standard No. J1097.  
 Rated loads do not exceed 87% of hydraulic lift capacity or 75% of tipping load.

# Hydraulic Excavator

## PC800-8/LC-8

### Standard and Optional Equipment

#### ENGINE

Komatsu SAA6D140E-5, 370 kW turbocharged common rail direct injection diesel engine, EU Stage IIIA compliant	●
Radiator & oil cooler with fly net	●
Automatic engine warm-up system	●
Engine overheat prevention system	●
Cooling fan: remote hydraulically driven variable speed, reversible	●
Auto-deceleration function	●
Engine ignition can be password secured on request	●
Alternator 24 V/90 A	●
Starter motor 24 V/11 kW	●
Batteries 2 × 12 V/240 Ah	●

#### HYDRAULIC SYSTEM

Electronic Open-centre load sensing (E-OLSS) hydraulic system	●
Pump and engine mutual control (PEMC) system	●
Working mode selection system (power mode, economy mode)	●
In-line filter for hydraulics	●
Adjustable PPC wrist control levers with 3 button controls for arm, boom, bucket and swing	●
Heavy lift mode	●
2 mode boom control	●
Additional hydraulic circuit for hydraulic breaker operation (for use with 7,1 m boom and 2,9 m arm)	○
2 additional hydraulic circuits for hydraulic breaker or hydraulic crusher operation (for use with 8,0 m boom and 3,6 m arm)	○

#### UNDERCARRIAGE

Track frame undercovers	●
Track roller guards (1 per side)	●
LC undercarriage	○
610, 710, 810, 910, 1.010, 1.110 mm wide double grouser shoes	○
Extra additional track roller guard	○
Full length track roller guards	○

#### CABIN

Reinforced safety SpaceCab™; highly pressurised and tightly sealed hyper viscous mounted cab with tinted safety glass windows, large roof window with sun shade, one piece, fixed laminated front window, front window wiper with intermittent feature, sun roller blind, cigarette lighter, ashtray, luggage shelf, floor mat	●
Heated, high back air suspension seat with lumbar support, height adjustable arm rests and retractable seat belt	●
Automatic climate control system	●
12 Volt power supply	●
Radio	●
Lower wiper	○
Rain visor (not with OPG)	○

#### SERVICE AND MAINTENANCE

Automatic fuel line de-aeration	●
Double element type air cleaner with dust indicator and auto dust evacuator	●
KOMTRAX™ - Komatsu wireless monitoring system	●
Multi-function video compatible colour monitor with Equipment Management and Monitoring System (EMMS) and efficiency guidance	●
Toolkit and spare parts for first service	●

#### WORK EQUIPMENT

7,1 m mono boom	○
8,0 m mono boom	○
2,9 m; 3,6 m arms	○
Komatsu buckets	○

#### SAFETY EQUIPMENT

Lockable fuel cap and covers	●
Audible travel alarm	●
Machine cab handrails and catwalk	●
Step light with timer	●
Battery main switch	●
Rear view camera system	●
Boom safety valves (not with additional hydraulic function)	○
Arm safety valves (only with boom safety valves)	○
OPG Level II front guard (FOPS)	○
OPG Level II top guard (FOPS)	○

#### DRIVES AND BRAKES

Hydrostatic, 2-speed travel system with automatic shift and planetary triple reduction final drives, and hydraulic travel and oil disc parking brakes	●
PPC control levers and pedals for steering and travel	●

#### LIGHTING SYSTEM

Working lights: 2 cab roof (front), 1 boom, 2 revolving frame, beacon	●
---	---

#### OTHER EQUIPMENT

Remote greasing for swing circle and pins	●
Standard colour scheme and decals	●
Parts book and operator manual	●
Biodegradable oil for hydraulic system	○

Further equipment on request

- standard equipment
- optional equipment
